## Cable TV Services

### **What do I need to view cable TV?**

- You will need a TV that can handle a coaxial video connection with a QAM tuner.
- You need to provide a coaxial cable to reach from your television to the cable outlet located in your room.

### **Why don't I have cable TV service?**

- Make sure that the TV has power and that the all cable wires are properly connected to the correct cable outlet. If you're not sure ask your RA.
- Check all wires for damage.

### **How do I program my TV?**

- Simply set the TV to "cable" and run a channel scan or auto program in the menu. (It may be necessary to consult the owner's manual that came with the TV since manufacturer's specifications do vary).

### **How to report a problem:**

- Send an e-mail to [unionhelp@mail.barry.edu](mailto:unionhelp@mail.barry.edu)
- Call 305.899.4900
- Visit us at the Student Union, room 103.
