Biomedical and Forensic Photography

(B.A. 61 credits min.)

The Biomedical and Forensic Photography specialization is for students with a combined interest in photography, biology, and/or criminal justice. Acceptance into the Biomedical and Forensic Photography specialization is not guaranteed. It requires a combination

of a successful interview and portfolio review with the Director of the Forensic Imaging Bureau of the Miami-Dade County Medical Examiner's Office, successful completion of BIO 220 Human Anatomy, and PHO 394 Biomedical and Forensic Practicum (a 3-credit on-site photography practicum taken during summer). It is recommended that this process be completed prior to the junior year. An integral part of this program is PHO 499, a 21 week, 12 credit intensive internship at the Forensic Imaging Bureau to be completed as the final requirement for graduation. This internship fulfills the University's requirement for an integrative experience.
